LifeCare Clinic Asset - Read Me

Thank you for downloading the LifeCare Clinic Asset!

- Ready to Use: All textures and materials are included. Simply drag and drop the model into your Unity project, and it's ready to go.

- Customizable Features: The clinic building is fully completed, but elevators and similar features have not been added. We've intentionally left the high areas on the building side empty, giving you the flexibility to customize it according to your project's needs.

- Your Feedback Matters: We'd greatly appreciate it if you could rate the LifeCare Clinic asset on the Unity Asset Store. Your feedback helps us improve and create even better assets!
